IT Consulting Services

Business Analysis

Identify and define the solutions that will maximize the value delivered by an organization to its stakeholders by defining the goals and requirements for programs and projects or supporting continuous improvement in its technology and processes.

Gap Analysis

By assessing the differences in performance between business information systems or software applications to determine whether business requirements are being met and, if not, what steps should be taken to ensure they are met successfully.
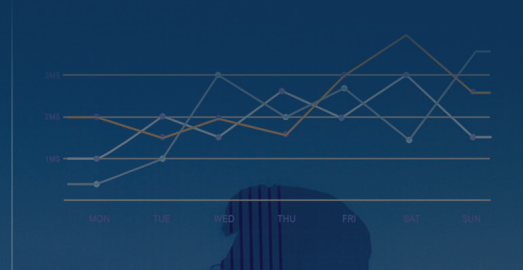

Software Application Solutions

We deliver a full range of software application solutions that help our partners/clients to improve productivity, profitability and revenue growth while reducing operating costs.

Computer Network Solutions

We help customers by effectively using critical business information collected across your organization to identify what hardware and network solutions are best suited for your the company's day to day activities.

Technical Support Services

Provide services including technical writing, mdifications, testing and supporting software to meet specific needs, technical training manuals, technical policies and guidelines.

Technical Consulting & Advisory Services

Our technology advisory services professionals help middle-market businesses and non-profit organizations adapt to new technologies and implement strategic plans that enable progress, generate value, and support growth.

IT Security Audit

Our certified professionals helps organizations to test and assess their overall security posture including cyber security. We verify that your current security strategy is adequate or not and check that your security training efforts are working. Uncover any extraneous hardware and software, uncover flaws and prove the organization is compliant with regulations.

Project Management & Coordination Services

We delivers a full range of software application solutions that help our partners/clients to improve productivity, profitability and revenue growth while reducing operating costs.

IT Outsourcing Services

Technical Resource Contracting

Deliver certified resources in business analyst, technicians, solution architects, support engineers, developers, project coordinators, project managers and others for the required IT infrastructure after careful system study, defining of skill sets and job roles for the requirements on a contract basis.
